

YET404PC

Four-Circuit Wireless Intelligent Receiving Receiver

I. Main technical indexes

- **Voltage:** DC12V, DC24V (optional)
- **Working temperature:** -40°C~+80°C
- **Frequency:** 315MHz, 433MHz (optional)
- **Controller capacity:** 30 (learning & fixed code), 6 (rolling code)
- **Size:** 74.5×54.5×27mm
- **Static current:** $\leq 9\text{ mA}$
- **Flexibility:** $\leq 105\text{dBm}$
- **Contact current:** $\leq 10\text{A}$

II. Output means

- A. Signal toggle—jumper inserted on 1 B. Signal latch—jumper inserted on 2
C. Signal momentary—not insert jumper D. 2-circuit toggle, 2-circuit momentary—
jumper inserted on 1 and 2 (301 not equipped with this function)

III. Methods and steps for learning and clearing code

Learning & fixed code:

Press "Learning" button on the Receiver, release it until LED light flickers, Receiver in learning status (LED goes out this moment), then press related button on Remote control to monitor this Receiver. When LED on Receiver flickers 5 times and then goes out, it indicates Learning has been done. It can response to up to 30 Remote control of this mode.

If Remote control is lost and wanting to make it invalid totally, press "Learning" button (more than 8s) until LED goes out, then Receiver will eliminate all contents automatically. If want to reuse it, just learning one more time again.

Rolling code:

Press "Learning" button on the Receiver, release it until LED light flickers, Receiver in learning status (LED goes out this moment), then press related button on Remote control to monitor this Receiver. If LED light is flickering slowly all the time, this indicates First Learning has been done; press "Learning" button again and release it until LED flickers, this indicates in Second Learning status (LED goes out), press the same button on Remote control, LED will flickers 5 times quickly, this indicates Learning has been accomplished. It can response to up to 6 Remote control of this mode. If Remote control is lost and wanting to make it invalid totally, press "Learning" button (more than 8s) until LED goes out, then Receiver will eliminate all contents automatically. If want to reuse it, just learning one more time again.
